

## Introduction

Dr. Xue-bin Chi is a director assistant of Computer Network Information Center (CNIC) of Chinese Academy of Sciences (CAS), also the director of Supercomputing Center of CNIC. He engaged in parallel computing since 1986, and got Ph D in that area in 1989. His major is numerical computing on linear and non-linear algebra equations as well as grid computing and HPC system management. Now he is in charge of several national and CAS projects on grid computing and supercomputing environment. He had achieved several awards in state science and technology progress and finished many state and CAS research projects.
